

EKS

INTERNATIONAL

EKS

The new image of EKS INTERNATIONAL in 2002 is one of a strong personal and kitchen scale enterprise. We have six factories located in France, Sweden and China, in total a production area of 80,000m². The new EKS is equipped with an advanced research and development department, tooling workshop and highly automated production facilities which means that 90% of production is in-house. Moreover, restructuring in the company has led to a better utilization of both new and existing equipment that has resulted in a 30% increase in production capacity.

This year, our product collection includes many new items that, we believe, will bring vitality to and better suit the market needs. Together with our latest amendments, high production capacity, up-to-the-minute designs and a vast variety of high quality, multi-functional products we seek to satisfy our customer needs. With new design and state-of-the-art technology at the core of the EKS 2002 collection, we are confident that our number-one aim – **customer satisfaction** – will be attained.
