

A worthy role model for future pressure cookers. Where aesthetics, convenience, ease of use and safety collaborate to give you the most satisfying cooking experience. Yet.

- Looks and style for the new millennium.
- Made of mirror finish stainless steel - ever lasting good looks.
- Clad base for uniform heat distribution.
- Sleek stainless steel lid that fits snugly on to the pressure cooker.
- Ergonomically designed, stay cool, matt finish handles.
- New specially moulded console, attached to the auxiliary handle to allow easier handling.
- **Comprehensive set of 4 safety features -**

Unique Zero Pressure Technology - Ensures that the cooker remains locked until the pressure inside drops to zero.

The Pressure Regulator - Maintains pressure throughout the process of cooking.

The Metallic Safety Valve - It is a special, heat-sensitive alloy pellet, which melts when too much pressure builds up, letting out the steam.

The Gasket Release System - It releases excess pressure safely downwards. It is activated in the event of a blockage in the vent tube.

MANTRA NUGEN SERIES STAINLESS STEEL COOKERS
